# CLASS INFO

This class is designed for the certified handler to provide training to improve the performance and safe deployment in real life scenarios common to Police Canine Work today. Teams will be instructed on the following topics over a three day, high intensity seminar: Canine triage and emergency first aid, decoy skills, advanced woodland searches, advanced building searches and suspect interaction during deployments. There will also be a problem solving workshop to address issues with teams in attendance. Whatever, your issue is, we have instructors ready to provide helpful resolutions to make a difference in your performance. In the police canine field, statistics show teams are 38% more likely to be involved in a violent confrontation resulting in the use of deadly force either to overcome resistance or protect the officer. We all know, in a time of crisis, you generally will not rise to the occasion; rather, you resort back to the level of training you have received. We aim to provide that training to the attending teams to help prepare officers and impart techniques aimed at making the deployment safe and tactical. Our instructors are handlers and trainers in the State of Florida and can speak from first-hand experience and knowledge gained in the field. Decades of experience provide for sound tactical and efficient training for each team.

# EQUIPMENT

Each handler should bring the following to class:
